CYBERSECURITY ALERT – MALICIOUS CYBER ACTIVITIES LEVERAGING WUHAN CORONAVIRUS SITUATION

According to SingCERT, opportunistic cyber criminals are leveraging the Wuhan Coronavirus situation to conduct malicious cyber activities through means such as emails or messages that entice users to open malicious attachments by offering more information related to the Wuhan Coronavirus situation.

Members are reminded to stay vigilant against any phishing or social engineering activities during this period of time.

Members are advised not to click on links or open attachments found in suspicious-looking emails or messages, and refer to official sources such as the Ministry of Health (MOH) website for the latest information on the Wuhan Coronavirus situation.
